

ESAB Pre & Post Weld Preparation Consumables Grinding & Cut-Off Wheels

ESAB's Pre & Post Weld Preparation Consumables are designed for effective joint preparation and post weld cleaning to ensure good quality welds. ESAB's range of consumables with its effective metal removal ratio ensures that minimal consumables are used for joint preparation prior to welding & surface cleaning before and after welding.

These consumables are designed to meet end users' requirements in terms of efficiency, safety and quality. The resistant aluminum oxide reinforced with layers of fiberglass mesh ensures long life and reliable safety.

Ferro series of cut-off and grinding wheels offer a range of coarse and medium abrasives for pre & post weld preparation with minimum burr generation during cutting.

These consumables comply with international standards and safety requirements such as EN 12413.

- Aluminium oxide grain for long life
- Minimum burr generation while cutting
- Heavy-duty grinding of ferrous metals
- Reinforced fiber-glass layers for safety
