

Welding Curtains

Welding Curtains

Three colour types are available and all three can be supplied as standard curtains. The self-extinguishing material provides good protection from dangerous welding radiation. The curtains are equipped with press-studs for easy, strong fastening and they are folded at the top and the bottom to withstand harsh use. All approved according to prEN 1598. The mounting rings come in a package of seven, which is enough to mount any of the curtains (supplied in a standard length of 1.8m x 1.4m). Rings are included when ordering any of the curtains.

Welding curtain, Dark Red	2001004001
Welding curtain, Green Transparent	2001004002
Welding curtain, Dark Green (DIN 9)	2001004003
Welding strip curtain, dark red, 1,8 x 1,4m	2001004004
Welding strip curtain, green transparent (DIN 6), 1,8 x 1,4m	2001004005
Welding strip curtain, dark green (DIN 9), 1,8 x 1,4m	2001004006

Welding Gloves

Welding Gloves MIG/MAG/MMA & General Handling

Test against mechanical stress such as abrasion, cut, tear and puncture.

Test for thermal performance such as exposure to an open flame, contact heat, convective heat, radiant heat, small and large splashes of molten metal.

Welding Hand Gloves

A welding glove made of hard-wearing, heat resisting chrome leather, fully lined and KEVLAR stitched. This glove is used for MIG/ MAG/MMA welding.
