

SKIL Cordless Screwdriver/Drill 2220

Cordless Screwdriver/Drill 2220, are technologically advanced drilling machines, which are ergonomically designed with a soft and handy grip that provides for comfortable work. These machines are offered with two-sleeve keyless chucks, which allows easy changing of bits. Our machines enable high precision in drilling and screw driving through wood, metals and other materials.

Features:

- Comfortable large variable-speed electronics switch
- Optimal operation with run-out brake for exact screw driving
- Reversible switch with switch-on lock
